

Access Anytime, Anywhere

Business Consulting

Solution architects in Mobiloitte, help and guide customers across domains in scoping and discovery of their mobile app idea. Main emphasis is laid on technical framework and interoperability, usability, scalability while appeal, themes, navigation structures, graphics, interface elements, and content remains an integral part.

Apps Design & Development

Mobiloitte brings in more than a decade of experience in designing and developing mobile apps both in the native (iOS, Android, BlackBerry, Windows) and hybrid (Cross-Platform, PhoneGap, Ionic, Angular JS, Titanium) platforms. High emphasis is placed on delivering easy-to-use interface that are developed by integrating multiple technologies and platforms.

QA & Testing

Strategic consulting methodology is followed for delivering accurate test strategies for software, using appropriate tools, thus ensuring zero bug delivery. Mobiloitte QA experts identify bugs at an early stage of project life cycle using Early Defect Detection Framework (EDDF).

Support & Maintenance

Once an app is rolled out in the marketplace, Mobiloitte extends all necessary support in terms of enhancements, improvizations and other changes aligned to data-driven insight and market intelligence.

Apps Marketing & Promotion

Post identification of potential app users in conjunction with our client, the Mobiloitte digital marketing team devise strategies to reach out to them through their preferred channel of communication and focused content for better recall. Apart from marketing plans, we also use the right metrics for performance measurement.

Monetization

Mobiloitte leverage customer's app user data to improve retention and increase engagement with a data-driven engagement strategy and target oriented messaging by focusing on current users, thus making it much easier to cost-effectively monetize them.

App Analytics

Mobiloitte undertakes gap analysis of existing mobile apps build on any technology platform, that are not developed by us, to fix bugs, add enhancements, improve UI, optimize functionality or address any other issue that the app owner is experiencing. Central to the process of gap analysis is that the app owner is able to realize the purpose and the potential for which the app was actually developed.

Mobile Gaming

Mobiloitte develops engaging mobile games using Unity 3D and Cocos 2D platforms. Leveraging hardware capabilities of smartphones, like magnetometer and accelerometer, etc. Mobiloitte builds games for different genres like adventure, casino, educational, puzzle and racing, etc.
