

## Transforming Businesses, Driving Growth

### Business Process Automation

In this era of agility and fast evolving technologies like Bots, Artificial Intelligence, IoT, etc., it is only natural to automate.

Leverage Mobiloitte's experience of working with large enterprises (like Sandisk, Equinix, Goodyear, etc.) to optimize work-flow processes, cut costs and increase productivity.

Mobiloitte's expansive module of automation solutions adds accuracy and precision to business processes across domains from the simplest to most complex operations.

### ERP Integration

Utilizing the expertise of its Solution Architects, Mobiloitte provides tested solutions for integrating key business data and information. The Mobiloitte ERP Integration Module entails:

- Unifying the data across functions such as Sales, Marketing, HR, Finance, etc. that may be using different and complex operation platforms
- Bringing the data on a common platform for both mobile and web
- Regulating the flow of data
- Real-time dashboards for reporting and analytics

### Performance & Security

Mobiloitte has helped businesses to adopt paperless transactions across their entire ecosystems while ensuring user authentication, audits and other security best practices. This also includes secure access to documents through web portals and mobile applications. Mobiloitte endeavours to ensure that our clients obtain the best value from their enterprise applications with the highest level of security and minimum business disruption.

### Digitization

Mobiloitte offers proven and cost-effective digitization of an extensive variety of records in a safe, secure and performance oriented virtual environment (cloud) that encompasses HR records, customer service, risk & compliance, supply chain, products, technical dossiers, different types of administrative records for businesses & government agencies alike.

### Migration of Legacy Applications

Mobiloitte specializes in re-designing and re-engineering of legacy applications attuned to prevalent user preferences and practices. The process includes complete range of GUI migration, application implementation and upgradation of database.

### Business Analytics

Creating world-class mobility and other custom IT solutions for diverse verticals for over a decade Mobiloitte has embraced new technologies seamlessly throughout. As such, Mobiloitte brings in a veritable thought-leadership as far as emerging technologies are concerned, be it Apps, BOTS, IoT, etc. This allows us to proactively propose and seamlessly implement alignments and/or adopt newer technologies aimed at enriching user experience and optimizing operational efficiencies.

### Support & Maintenance

At Mobiloitte, support & maintenance is not just restricted to back-end support or need-based service or maintenance. The support extends to proactive upgradation of systems/APIs necessitated by introduction of new technologies/versions/plugins for seamless transition to enable businesses to concentrate on their core business activity.
